

Sample Name: Pentaerythritol Trimethacrylate

Product #: P42097-PER-TMA

CAS #: 3524-66-1

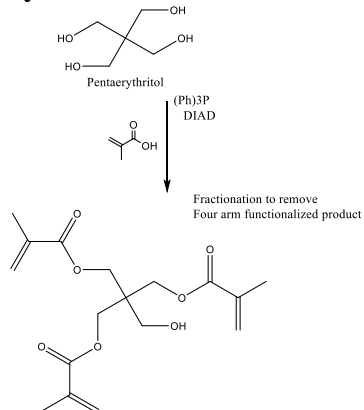

Structure:

Composition:

| Mn x 10 ³ | PDI |
|----------------------|------|
| 0.34 | 1.05 |

Synthesis Procedure:

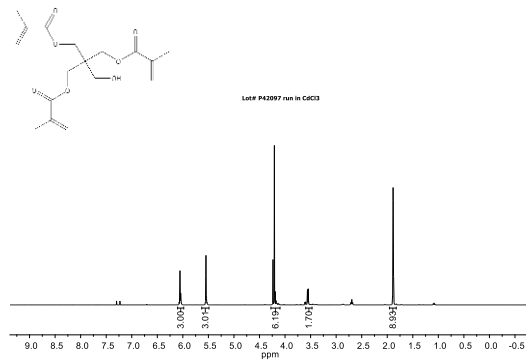

Characterization:

The product was characterized by HNMR.

Purification of the obtained product:

Purification of the obtained Oligomer was carried out rigorously as follows to ensure the removal of the four arm architecture by passing product in THF to a column containing silica.

HNMR of the Oligomer in CdCl₃:

HNMR of the Oligomer in DMSO:
